

How to use an WAM700

1. Turn on the WAM700

2. Create a Patient. Press button (1) in the screen and input the patient information.

3. Press "Save & Diag" button (5)

4. Position the patient. Use the mark lines and the chinrest button in the screen.

Remark: Before beginning a measurement, make sure that the patient's eye is centered in front of the Camera View. Use chinrest buttons (4)

5. Initialize the process:

Select the protocol of the test. (WF, Topo, Pachy, Tono, Refraction)

Automatic Eye tracking > Just press the button Product will automatically take all the measurements for each eye.

6. Print the data and export data.

Press "Export" button.
