Struggling with Chronic Inflammation?
 Want to Soothe the pain? →

There is a **painless, effective** way to manage it.

Book an appointment **NOW.**

epi-c plus®

The all-in-one powerhouse for light therapy.

epi-c plus® – featuring unique **Light Modulation® LLLT** and **Optimal Power Energy® IPL** technologies, for optimal, non-invasive treatment of most inflammatory conditions.

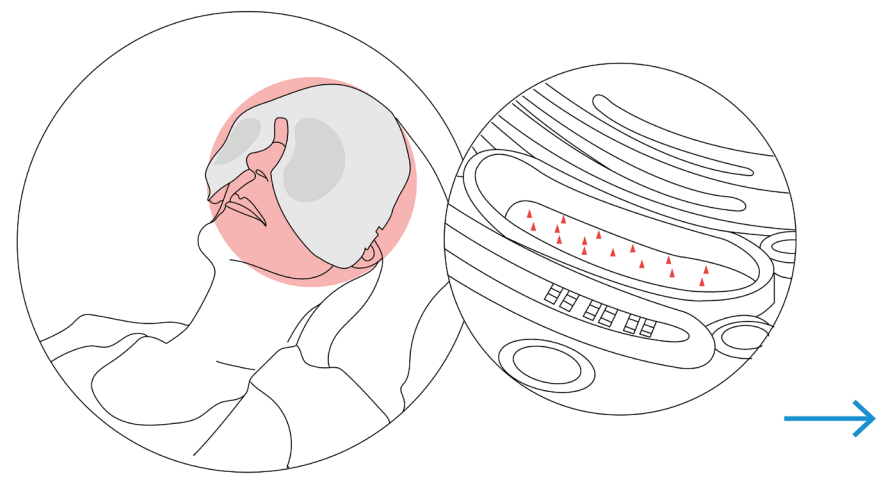

- Light Modulation® LLLT
- Optimal Power Energy® IPL

Distributed by Essilor Instruments USA

LM[®] LLLT

Low Level Light Therapy.

Science told us.
It just works.

Light Modulation[®] Low-level Light Therapy—a technology like no other.

- it's fast—a treatment lasts 15 minutes
- it's painless
- it grants immediate relief
- it's easy and safe

Distributed by Essilor Instruments USA

Optimal Power Energy[®] IPL

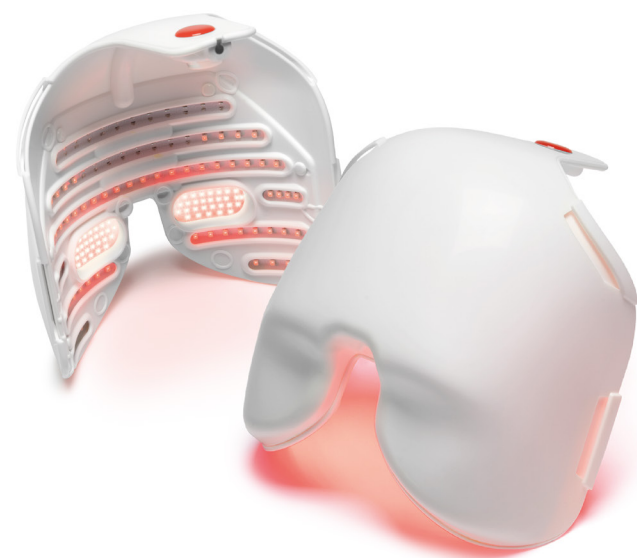

OPE[®] IPL is the only pulsed light in the world allowing for usage without any protective gel.

- improves blood circulation
- disperses vessels
- anti-inflammatory cytokine release

Distributed by Essilor Instruments USA

Red LM[®] LLLT

Used for Inflammation Reduction and ATP Production Stimulus

- Increased **ATP Production**
- **Boosted cell metabolism**
- **Inflammation reduction** by regulating antioxidants
- Activated transcription factors and signaling pathways
- **15-minute painless treatment**

Distributed by Essilor Instruments USA

Blue LM[®] LLLT

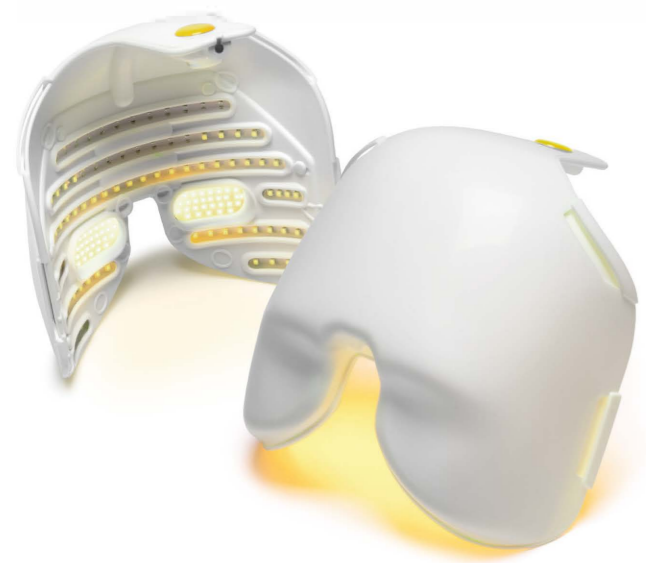

Used for Bacteria elimination and Microbiome Stabilization

- Blue light **is absorbed** by bacteria's porphyrins
- Porphyrin molecules produce singlet oxygen radicals, **damaging bacteria cell walls**
- Weak bacterial defense against singlet oxygen **enhances photodynamic inactivation**
- **15-minute painless treatment**

Distributed by Essilor Instruments USA

Yellow LM[®] LLLT

Used for **Drainage**
and **Swelling Reduction**

- **Enhances mitochondrial respiration**, boosting ATP production
- **Stimulates nitric oxide release** for neuro-transmission and tissue repair
- **Reduces inflammation** by **decreasing edema** and enhancing skin elasticity, while also **lowering metalloproteinase activity**
- **15-minute painless treatment**

Distributed by **Essilor Instruments USA**

“ Ideally, a technology employed for disease prophylaxis should be **fast, easy to use, non invasive, painless** and **safe**, without any contraindications or influences on surgery. →

G. GIANNACCARE - MD, PHD, FEBO

SOURCE: Outcomes of Low-Level Light therapy for the Prophylaxis of Iatrogenic Dry Eye After Cataract Surgery: A prospective Randomized Double-Masked Controlled Clinical Trial

All these characteristics are incorporated in LM[®] LLLT thus making this technology suitable for improving patients' comfort after surgery.
